

**The Clinical Progression** is designed to help track the amount of repetitions completed for each skill. The minimum number of reps is listed in the chart; however, the objective is to complete as many repetitions as possible in each skill to build competency and confidence in performing all basic dental assisting duties. As new topics are introduced each week you will continue to practice skills introduced from previous weeks until master competency is achieved. You will also continue mastering your skills throughout the externship.

Skills	Beginner	Intermediate	Advanced	Master
<b>Radiology</b>				
BW Dexter	1	2	n/a	n/a
FMX Dexter	1	2	n/a	n/a
FMX Live Patient	n/a	1	3	4
